

DEVOPS LAB - PROGRAM 1

Java and Maven Installation using CMD

Step 1: Verify Java Installation

Open Command Prompt and run:

```
java -version
```

Expected Output: Java version 21.x.x

Step 2: Verify Maven Installation

Run:

```
mvn -version
```

Expected Output: Apache Maven 3.x.x

If Java is Not Installed

1. Download JDK 21 from Oracle.
2. Install JDK.

3. Set JAVA_HOME:

```
setx JAVA_HOME "C:\Program Files\Java\jdk-21" /M
```

```
setx PATH "%PATH%;%JAVA_HOME%\bin" /M
```

Install Maven

1. Download apache-maven-3.9.x-bin.zip
2. Extract to C:\Maven
3. Set MAVEN_HOME:

```
setx MAVEN_HOME "C:\Maven\apache-maven-3.9.11" /M
```

```
setx PATH "%PATH%;%MAVEN_HOME%\bin" /M
```

Final Verification Commands

```
java -version
```

```
mvn -version
```

```
gradle -version
```
